## Damaniyat Islands

(Friday, March 14, full day)

2.Hycoon, 3.AI Qafsiyah, 4.AI Jabal Kabeer, 5.AI Qurfah, 6.Wlad AI Quarfah, 7.Qesmah

The nine, tiny, uninhabited islands lie about 11 miles off the Batinah Coast and are the jewel in the crown for diving or snorkeling in the Gulf of Oman. Coral reefs cover up to 70% of the dive sites with more than a hundred different species of soft and hard coral. Marine life is abundant with prolific numbers of colorful reef fish, stingrays, occasional turtles, Leopard Sharks and on rare occasions a Whale Shark. With the vast variety of sea life and coral close to the surface, snorkeling is a particularly rewarding experience.

The islands have been protected as a **nature reserve** since 1996 and provide an important nesting site for hawksbill and green turtles, as well as a wide range of migratory birds including the increasingly rare sooty falcon (which can also be found in the Sawadi Islands), one of the few migratory raptors which actually nests and breeds in the region.

Given their protected status, access to the Daymaniyats is restricted, and you're not allowed to land on the islands from the beginning of May until the end of October; the rest of the year a permit is required, which will be arranged through the boat operator.

Our boat will be an open boat (without a cabin or other facilities) with shaded sitting area (pls see below photos). It has space for max 15 people.

The plan is to start from As Sawadi beach at 8 am prompt. It will take us less than 1 hour (depending on weather) to reach the archipelago. First we will visit is the sandy beach of island Junn, where we will drop our anchor and snorkel. We will then cruise across to the next major island in the chain, Police Island, named because of the small Police station there set up to protect the Islands and check on our permits. Depending on time we can then make other stop(s) or just drive around the islands and observe the rest of the coast and the bays from the boat. We have to return to As Sawadi port before the sunset. **This is an exclusively snorkeling trip, we will only stop at the beaches & depths suitable for snorkeling (no diving).**

## Sawadi islands

**(Saturday, March 15, half day - morning)**

The rocky and windswept **Sawadi Islands** lie just offshore from Sawadi Beach. The largest of the seven islands lies almost within spitting distance of the beach, a large rocky hump topped by a string of watchtowers, while the other smaller islands lie further out to sea.

It's possible to walk across the sand to the main island at low tide, though take care you don't get stranded when the tide comes back in.

**Boat trips** can be arranged by bargaining with the local fishermen on the beach for around 10 OR/100 AED per boat (for 4 people). The trip includes a snorkeling/shelling stop on one of the islands and a tour around Sawadi Islands. Sawadi **beach** is littered with exotic-looking seashells, perfect for a stroll and a spot of beachcombing.
